PROFESSIONAL SUMMARY

Motivated 4th-year Computer Science and Engineering student currently in the 10th semester, seeking to start a career in web development as a fresher. Developed academic and personal projects using React, TypeScript, JavaScript, Laravel, PHP, MySQL, HTML, and CSS. A fast learner with strong problem-solving skills and a keen interest in building responsive and user-friendly web applications. Seeking a Junior / Trainee Frontend or Stack Developer role to apply my technical knowledge, gain professional experience, and grow as a software engineer.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3

Frontend: React.js, Next.js.

Backend: Node.js, Express.js, REST API design.

Database: MongoDB, MySQL

Tools & Platforms: Git & GitHub, VS Code

Database Management & SQL: Advanced Data Querying, Data Manipulation, Query Optimization

Data Analysis & Reporting: Microsoft Excel , Data Cleansing, Real-World Dataset Processing,

AI & Emerging Tech: Applied AI Tools for Analytics, Modern Data Workflows, Emerging Data-Driven Technologies.

Currently Learning: React.js, Next.js, Node.js, Express.js, REST API design,MongoDB

PROJECTS

Project Name — Expense Management System

Database Design & Optimization: Designed and implemented a structured, normalized MySQL database to accurately store, categorize, and track daily financial transactions. **Data Manipulation & Querying:** Wrote advanced SQL queries (utilizing joins, aggregations, and grouping) to extract, manipulate, and analyze expenditure data across multiple tables. **Analytics & Reporting:** Developed a reporting framework to transform raw dataset inputs into actionable monthly budget summaries and spending trend insights.

Problem-Solving: Identified and optimized slow-running queries to ensure efficient data retrieval and seamless dashboard reporting.

Using: MySQL

Project Name — Digital Image Processing Project

Explored different image processing techniques including median filtering, thresholding, morphological erosion, and boundary extraction etc. The process involved reducing noise, converting the image into a binary form, refining the segmented objects, and finally extracting their boundaries for better shape analysis.

A great hands-on experience in understanding how basic image processing techniques work together in Computer Vision.

Project Name — An Assembly Calculator

<https://github.com/ashaxiong-lgtm/AssemblyCode.git>

Using- 8086 assembly code.

Project Name — Portfolio

https://ashaxiong-lgtm.github.io/assignment_1/ | https://github.com/ashaxiong-lgtm/assignment_1

Using: CSS & HTML

EDUCATION

Bachelor of Science (B.Sc) in Computer Science & Engineering, Southeast University
– 4th year at Present | Expected Graduation: 2027

CGPA- 3.96 / 4.00

Higher Secondary Certificate (HSC) | Daud Public School and College | Group: Science | Year: 2022
GPA: 5.00 / 5.00

Secondary School Certificate (SSC) | Jashore Collectorate School and College | Group: Science | Year: 2020
GPA: 5.00 / 5.00

ACHIEVEMENTS & EXTRACURRICULAR

- Volunteer, Bangladesh Red Crescent Society — Participated in community service, volunteer activities, and social welfare initiatives.
- Contributed to volunteer initiatives and worked collaboratively with team members.
- Developed communication, teamwork, and organizational skills through volunteer activities.
- Participated in university seminars, workshops, and technical activities related to Computer Science and Engineering.
